

Source Collection and Threat Reduction Program (SCATR) | 2014 - 2015

2014 – 2015 CRCPD/SCATR Source Collection and Disposal Opportunity

The Conference of Radiation Control Program Directors (CRCPD) Source Collection and Threat Reduction (SCATR) program provides cost-share support for the collection and commercial disposal of Class A, B, and C disused and unwanted radioactive sealed sources. SCATR is funded through a grant provided by the Department of Energy (DOE) National Nuclear Security Administration (NNSA). Cost-share amounts generally include collection, packaging, transport, and disposal.

The **2014 -2015 Nationwide SCATR Collection** will provide cost-share support of 45% for the collection and commercial disposal of eligible sources. Licensees in all 50 States and U.S. territories are eligible for participation in this effort.¹ To be considered for participation, licensees must register their disused and unwanted sources with the Los Alamos National Laboratory (LANL) Off-Site Source Recovery Project (OSRP) at:

<http://osrp.lanl.gov/SCATRTemplate.xls>

Interested licensees are encouraged to register their disused and unwanted sources as soon as possible to facilitate participation in this effort.² CRCPD will begin contacting registered licensees for participation in the effort in **October 2014**:

- Currently registered sources will automatically be considered for program participation. However, generators are encouraged to verify online that their registered source inventory and contact information is up to date;
- While CRCPD/SCATR sets source collection and cost-share targets on an annual basis, both are subject to funding and other limitations. *CRCPD/SCATR expects future cost-share amounts to decrease on a regular basis.*

For more information on CRCPD/SCATR or the 2014-2015 Nationwide SCATR Collection, please contact **Russ Meyer at 512-761-3822 or rmeyer@crcpd.org**, or visit <http://www.crcpd.org/StateServices/SCATR.aspx>.

¹ Licensees located in States not included in the 2013-2014 collection effort (i.e., those in States with membership in the Texas-Vermont, Northwest/Rocky-Mountain and Atlantic Compacts) will receive additional cost-share consideration;

² Source registration does not imply a commitment by either the generator or CRCPD with regard to program participation.
