Waste shipment heads to WIPP

The first shipment of radioactive sealed sources recently was transported to the Waste Isolation Pilot Plant from Technical Area 54. The waste is shipped in Transuranic Waste Package Transporter, or TRUPACT II containers. The waste was characterized at Los Alamos before packaging in 55-gallon pipe overpack containers for transport. The Lab's Offsite Source Recovery Project Team was directed by the Department of Energy to address the disposition of unwanted sealed sources. *Photo by Lee Leonard, Environmental Applications (RRES-EA)*
